```

The diagram illustrates a dependency or call relationship. On the left, there are four rectangular boxes, each containing a function name with its package path. On the right, there is a single, wider rectangular box, also containing a function name with its package path. Four blue arrows originate from the right side of each of the four boxes on the left and point towards the left side of the box on the right. The box on the right has a light gray background, while the others are white with black borders.
